**To whom it may concern**

**Declaration of compliance with REACH 1907/2006/EC regulation**

The REACH Regulation defines the safe production and use of chemicals in the European Union.

Louis Bélet SA does not produce any substances or formulations.

As a Swiss manufacturer of cutting tools, we are not subject to the REACH regulation.

We source all our raw materials from suppliers who, if necessary, have already registered or pre-registered the substances and materials. Our products are not subject to registration under REACH.

According to the SVHC (Substances of Very High Concern) list of 197 candidates, consulted in April 2019 on the ECHA (European Chemical Agency) website, our products and their packaging are not subject to any information obligation in accordance with Article 33.1. None of these SVHC substances are present in the materials we use in our products, nor in packaging and shipping materials. Consequently, Louis Bélet products do not contain more than 0.1% by weight of these SVHCs.

If a future list of candidates lists a substance contained in a product we have supplied, we will inform you as specified in the Chemicals Regulation.

Louis Bélet SA confirms that the safety and material data sheets of its suppliers concerning the materials and substances used in its products are within reach or that these documents will be made available by our suppliers.
