## Price adjustment 2026

Dear customer,

First of all, we would like to thank you for your precious loyalty. You are the essential component that enables us to continue creating and manufacturing innovative and high-performance tools. For you, we constantly work to improve our production in order to guarantee quality, that is the foundation of our mutual success.

However, since the beginning of 2025, we have faced a significant increase in the price of our raw material, tungsten carbide, at truly substantial levels.

Despite all our efforts, it is no longer possible for us to absorb such increases alone. Therefore, we must implement a price increase of approximately 3.5% across our entire product range, effective January 1st, 2026.

Please be assured that we will do everything in our power to continue our continuous improvement approach and provide you with tools and services that will allow us to push the boundaries together.

We thank you in advance for your understanding, particularly during this challenging period, and send you our best regards.

**Roxane Piquerez**
